

RHEA-3

Pure Sound, Pure Pleasure

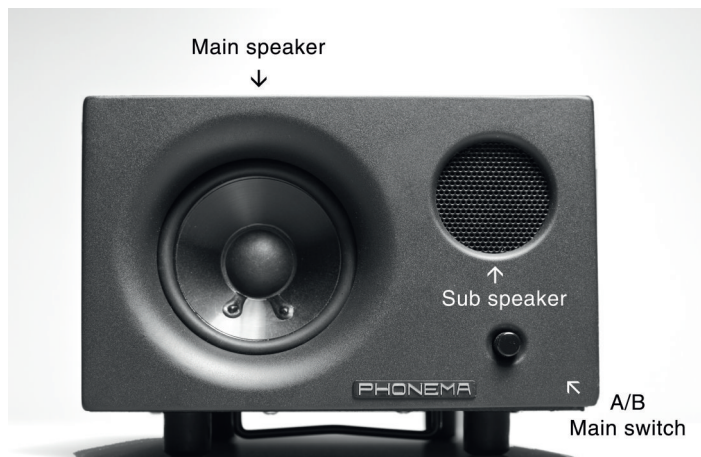

RHEA-3

Two speakers in one

Rhea-3 is a loudspeaker that offers the possibility to switch between two inputs. Via the G-Link connector, the selected audio can be replicated on a second loudspeaker.

In addition, the Rhea-3 features a second, fully independent and acoustically isolated loudspeaker. This feature enables Rhea-3 to play two audios simultaneously.

The Rhea-3 model is designed for modern transceivers with a front height of about 115 mm. Additionally, thanks to its adjustable stand it can be perfectly adapted to equipment whose height is between 110 mm and 130 mm.

The Best Driver

We have selected this 87 mm driver for its balanced response for all modulation systems. Both CW and AM broadcast signals sound clear over noise.

The membrane has an IP 64 protection that guarantees the best sound over the years.

Specifications

Box material:MDF
Inside Material:.....Acoustic Foam AG150
.....and Basotect
Dimensions:.....186x110x275 mm
Weight:.....2,25 Kg (4,96 lb)

Main

Power:.....10 W
Impedance:8 ohms
Frequency response:110 - 18000 Hz
Sensitivity:87 dB
Driver protection.....IP64

Sub

Power:.....3 W
Impedance:8 ohms
Frequency response:180 - 17000 Hz
Sensitivity:84 dB
Driver protection.....IP65
